

THE MATHEMATICS ENTHUSIAST

(formerly The Montana Mathematics Enthusiast)

ISSN 1551-3440

Vol.9, Nos.3, June 2012

1. Beyond Post-modernity in mathematics education
Ole Skovsmose (Denmark)
2. Moving towards new inter-cultural perspectives in mathematics education
Ingrid Dash (Sweden) & Bharath Sriraman (USA)
3. Inquiry- without posing questions?
Helle Alrø (Denmark) & Marit Johnsen-Høines (Norway)
4. Loss of Dimension in the History of Calculus and in Student Reasoning
Robert Ely (Idaho)

SECTION ON NORTH CALOTTE CONFERENCE IN MATHEMATICS EDUCATION (Tromsø 2010)

5. Editorial: On superficial geographical biases
Bharath Sriraman
6. Investigating engineers' needs as a part of designing a professional development program for engineers who are to become mathematics teachers
Ragnhild Johanne Rensaa (Norway)
7. From designing to implementing mathematical tasks: investigating the changes in the nature of the T-shirt task.
Claire Vaugelade Berg (Norway)
8. Foundations for success in mathematical competitions: A study of best praxis in lower secondary schools in Norway
Steinar Thoroaldsen & Lars Vavik (Norway)
9. University Mathematics Teachers' Views on the Required Reasoning in Calculus Exams
Ewa Bergqvist (Sweden)
10. Values in effective mathematics lessons in Sweden: what do they tell us?
Aihui Peng (Sweden/China) & Mikaela Nyroos (Sweden)
11. The role of theory when studying epistemological characterizations of mathematics lecture(r)s
Magnus Österholm (Sweden)

The Final Word

12. A New Consideration in the Search for Mersenne Primes
Cory Daignault & Joe Mott (USA)
