

## Contents

1. Introduction to SPSS for Windows .....	3
1.1 Starting SPSS .....	3
1.2 Types of Variables .....	5
1.3 Character (String) Variables .....	5
1.4 Entering Data in the Data Editor.....	5
1.5 Editing Data in the Data Editor.....	7
1.6 Saving an SPSS Data File.....	8
1.7 Opening an Existing SPSS Data File from Disk.....	9
1.8 Variable Labels .....	9
1.9 Value Labels .....	9
1.10 Printing in SPSS.....	10
1.11 Copying from SPSS into Microsoft Word .....	10
1.12 Using SPSS Help .....	11
1.13 Note on E notation for numbers.....	11
1.14 Creating new variables by data transformations .....	12
1.15 Using subsets of the data.....	14
2. Examining Distributions .....	16
2.1 Methods for categorical variables.....	16
Frequency tables .....	16
Bar graphs.....	18
Editing bar graphs.....	20
Pie charts.....	22
2.2 Methods for quantitative variables.....	22
Descriptive statistics for quantitative variables .....	22
Histograms.....	24
Editing histograms .....	26
Time plots.....	33
Comparing distributions .....	35
Numerical comparisons.....	35
Side-by-side boxplots.....	37
3. Looking at Data: Relationships .....	39
3.1 Relationships between quantitative variables .....	39
Constructing a scatterplot .....	39
Computing the correlation coefficient.....	40
Computing the equation of the least squares line .....	41
Computing residuals .....	43
Creating a residual plot.....	44
Editing a scatterplot.....	45
Adding the least squares line (SPSS versions 12.0 - 16.0) .....	45
Adding a reference line (SPSS versions 12.0 - 16.0) .....	46
Changing the size, color, and shape of the points (SPSS versions 12.0 - 16.0).....	46
Changing axis labels and positioning (SPSS versions 12.0 - 16.0).....	47
Adding the least squares line (SPSS version 11.5 or earlier).....	47

Adding a reference line (SPSS version 11.5 or earlier).....	48
Changing the size, color, and shape of the points (SPSS version 11.5 or earlier) .....	49
Changing axis labels and positioning (SPSS versions 11.5 or earlier) .....	50
Adding a categorical variable to a scatterplot.....	50
Adding separate regression lines .....	51
3.2 Relationships between categorical variables.....	54
Creating a two-way table .....	55
Entering count data.....	56
Clustered and segmented bar graphs .....	60
4. Sampling distributions .....	67
4.1 Selecting a random sample of cases.....	67
4.2 Simulating binomial data .....	70
5. Inference for Population Means .....	73
5.1 Inference for the mean of a population using the t distribution .....	73
Confidence interval for a population mean .....	73
t test for a population mean .....	74
Matched pairs t procedure .....	76
5.2 Comparing population means: the two-sample t procedure.....	79
6. Inference for Two-Way Tables.....	83
