Notice of free math tutoring this semester

24/7 Free Math Tutoring – EdReady Montana is here!

EdReady Montana is a personalized, free, no-credit, online program that will help students master the mathematics skills they need to succeed. EdReady Montana is designed to help students raise their ALEKS math placement exam scores and to provide assistance to students in developmental and 100-level math courses at the University of Montana. Since the program is online, students can work on the material at their own pace whenever it best fits into their schedule.

Important Note: EdReady Montana does not count toward any part of students’ grades in their math courses at UM. It is intended as a supplement only.

If you would like to learn more about EdReady Montana, please visit the website at http://edreadymontana.org or contact Lauren Fern, EdReady Montana Coordinator at UM, at fernl@mso.umt.edu.
